

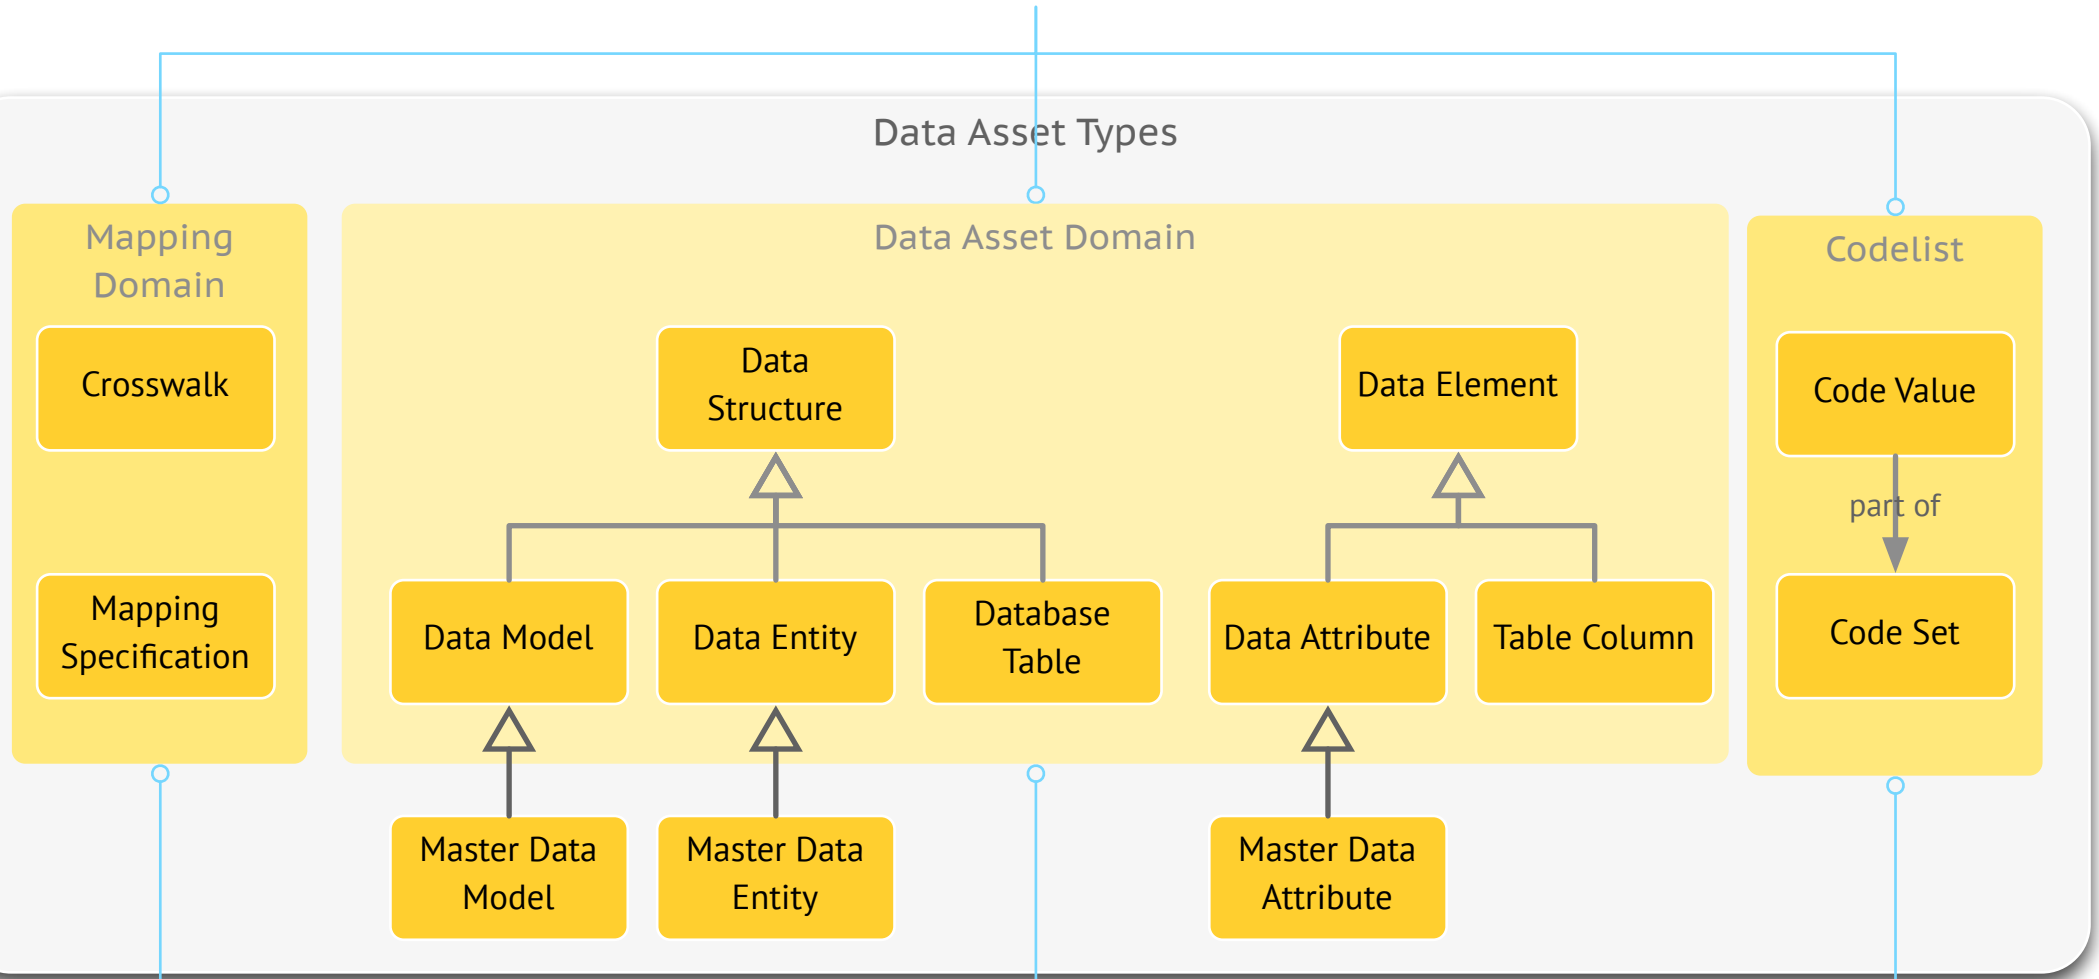

Mapping Domain, Data Asset Domain and Code List are 3 out-of-the-box domain types for grouping Data Assets.

Mapping Domain group Business Assets of the type **Crosswalk** (to map between Code Values) and **Mapping Specification** (used to map between Data Elements).

Data Asset Domain group Data Assets of the type **Data Model**, **Data Entity**, **Database Table**, **Data Attribute** and **Table Column**.

Code List groups Data Assets of the type **Code Value** and **Code Set**.
